

OB3/024/OSOC

Submission from Patricia Ashcroft, [REDACTED]

Wind farms

These wind farm projects are proposed as a solution for the strategic need for electrical power in the U.K. The proposals fail on a number of counts and should therefore be refused as uneconomic and causing unnecessary vandalism of the Welsh countryside.

I believe they fail in terms of:

- Technology proposed
- Practicality
- Efficiency
- Subsidy
- Environmental impact
- Ecological impact
- Economic impact

The Charter published by NOW (attached) details the points I wish to make.
