Outline statement to the inquiry

- 1) The applicants should be required to demonstrate that wind turbines are fit for purpose for the provision of low carbon energy given their detrimental effect on the efficiency of the back up energy required to support them.
- 2) The applicants should be required to demonstrate that wind turbines provide any net carbon saving to their use given the energy required and pollution caused in their manufacture
- 3) The applicants should be required to demonstrate that wind turbines are not a waste of tax payers' money given the level of subsidies for the 20% efficiency of electricity produced
- 4) The applicants should be required to demonstrate that wind turbines do not actually add to carbon emissions
- 5) The applicants should be required to demonstrate any benefit to the community that their inappropriately sited activities will bring
- 6) The proposed developments will be detrimental to the interests of the community
- 7) The proposed developments will have an adverse impact on health (The Human Radiation Effects Group at Bristol University)
- 8) The proposed developments will have an adverse environmental impact
- 9) The proposed developments will have an adverse visual impact
- 10) The proposed developments will have an adverse impact on tourism
- 11) The proposed development will have an adverse affect on property prices
- 12) There are no roads appropriate to the level of use proposed by the developers
- 13) The locations are not appropriate for the use proposed by the developers
