

Subject: Re: 132kv Overhead Line Connection from Llandinam to Welshpool Sub Station

Dear Sir

This email also sent to you as a letter.

I write to object to the overhead line connection because the proposal has been significantly altered without Public consultation.

Also the proposed line will duplicate the line to the sub station at Cefn Coch- leaving a needless expense of over £200million that the consumer (or taxpayer) cannot be expected to bear.

This unnecessary line would run through landscape of high scenic quality.

If this line is consented the developers will be first in to the subsidy goldrush. This scandal should be stopped.

Yours sincerely

William Beament
