

OBJ/401/OSOC
COMBINED PUBLIC INQUIRY – Powys Mid Wales

Statement of case

Name Rob Evans/ Suzanne Jones Email address : pontrobert pylons@gmail.com

First I request that the National Grid high voltage grid connection and substation are specifically included in the inquiry because they are a direct consequence of the proposed wind farms. The Mid Wales Connection is part and parcel of these proposed developments. It would clearly be against public policy and the public interest not to include it. It is also counter to local plans and has been brought forward without proper consultation by National Grid with local people who are strongly opposed to it and to the wind farms, which would trigger it.

We object to both the proposed wind farms and grid connection of the following grounds which will be fully addressed by MAP :

- adverse impact on tourism
- visual amenity loss
- wellbeing of the local people
- reduction in property values
- transport issues

Yours Sincerely

Rob Evans
