I wish to register my concerns and objections noted by **The Alliance** to the proposed Wind Farms and associated developments.

I also request that the enquiry is held in Welshpool a town closer to the homes of those who would be affected.

Also I request that the following to be included..

- Inspector to grant a concession under Inquiry Rule 19(5) allowing 3rd party objectors to cross-examine witnesses
- Effect of the Mid Wales connection as (a) transmission lines to hub, (b) hub itself and (c) transmission lines from hub to grid to be included in the Statement of Matters to be considered at the inquiry
- Hydrology/flooding implications
- Effect on tourism in locality
- Effect on Glyndwr Way and Offas Dyke Footpath

The subsidies given to the organisations who profit from this would be better invested in developing **reliable** and regular sources such as wave and geothermal.

Weighty consideration should be given to the Report by Gordon Hughes, "Why Is Wind Power So Expensive? An Economic Analysis"

Regards
Pam Martin
