powys wind farm public enquiries

19 December 2012 20:03

Dear Mrs Jones-Hughes

Would it be possible to hold the Wind farm public enquiries nearer the actual proposed area ie in Welshpool so that more of the public are able to attend?

I would also like to request that National Grid's plans for a hub and nearly 40 miles of high voltage transmission pylons are also included in this inquiry. As the applications are so far from the existing high voltage transmission lines, NG's plans are an integral part of the these applications and have to be considered in the cumulative effects and impacts of these proposals
