

COMBINED PUBLIC INQUIRY – Powys Mid Wales

Statement of case

Name Margaret Clennett

email: secretary.lag@gmail.com

I request that the National Grid high voltage grid connection and substation are specifically included in the Inquiry because they are a direct consequence of the proposed wind farms.

I object to both the proposed wind farms and grid connection on the following grounds:

- visual amenity loss: view of wind farms from afar, including from the Snowdonia National Park, and desecration of the Vyrnwy valley by pylons
- adverse impact on tourism, in Mid Wales as a whole and specifically in my local village of Llansantffraid where several caravan parks are based
- wellbeing of the local people
- reduction in property values
- transport issues
