## **STATEMENT OF COMMON GROUND BETWEEN THE FIVE WIND FARM DEVELOPERS AND POWYS COUNTY COUNCIL**

### **Cumulative Effects between SSA B and SSA C Schemes and TACPA Wind Farms**

The five wind farm developers and the Council do not consider that unacceptable in-combination cumulative landscape effects would occur between the wind farm schemes before the Inquiry in SSA B and C (over and above those in-combination cumulative landscape effects that would occur separately with the SSA B and C schemes respectively and on the basis of an existing baseline which includes those wind farms which are currently operational and consented). The Council declares that from a few locations, in particular weather conditions, there is the potential for additional significant visual effects (over and above those in-combination cumulative visual effects that would occur separately with the SSA B and C schemes) and that the area likely to be affected would be in parts of the landscape between SSA B and C where the sole visual effects of either would not be significant but together they would be significant. The five wind farm developers and the Council agree that, if there are significant visual effects as described by the Council, they are limited in extent, and do not render any or all of the schemes unacceptable.
